

CHAIN MASTER HOIST_BGV-C1 (Made in Germany)

Whether for installation work or complex scene changes, ChainMaster's BGV C1 hoists are used worldwide. Already in 1994, we were able to present the world's first certified chain hoist system. This put at the disposal of professional users and set designers the world over new possibilities and technologies, allowing them to realize their creative ideas with precision and in ways that could be reproduced.

Depending upon the application, the drives are fitted with ultra-precise sensors for load and position evaluation and guarantee the safe suspension and movement of loads of up to 2500 kg over human heads.
